

Krumpers Solar Blinds Prove Green is Gold!

With higher home energy costs continuing to soar and the HST now added to an already expensive home energy bill, consumers can obtain substantial savings by installing solar blinds. Identifying energy inefficiency is essential if you want to save on heating and cooling costs, with windows being the weakest part of the building envelope, due to heat gain in the summer and heat loss in the winter. Krumpers Solar Blinds™ utilize laboratory tested climate control technology. They offer excellent protection from the sun, heat and cold and are as transparent as sunglasses. Krumpers are well known in the national capital region and have been recognized by HomeStars.com in 15 different categories at its Best of Ottawa Awards event. HomeStars is powered by the reviews added by homeowners who try different home products.

Krumpers Solar Blinds™ are transparent, internal, sun and temperature control blinds.

They come as Roller Blinds and Vertical Blinds. Deluxe sidewinder chain operated blinds are used for normal vertical windows while panels are usually fitted to glass roofs, trapezoids or skylights. They are installed inside the window, and are designed to reflect the sun's rays and heat back through the glass before they can heat the room up or cause UV damage. In the winter they are reversed so that they still filter out UV

Former New Brunswick Premier Frank McKenna, Krumper's CEO Diana Livshits and former President Bill Clinton talk power... savings!

light but prevent heat from escaping through windows. The composition that makes Krumpers Climate Control Solar Blinds™ unique is that they are made from laminated polyester film.

The film has a thin coating of aluminum sandwiched between the laminations. The polyester gives the film its colour, strength and pliability; while the aluminum, which is so thin you can see through it, provides the medium for reflecting the sun's rays.

Winter Warmth

Krumpers Climate Control Solar Blinds™ can reduce winter heat loss by up to 45 per cent, depending on how they are installed.

Day Time Privacy

Krumpers Climate Control Solar Blinds™ work like a one way mirror during the day giving excellent day time privacy. There is a security element to this in that you cannot see in through a Krumpers Climate Control Solar Blinds™ during the day, or at night when the lights are turned off. Krumpers solar blinds are also washable, although some users never need to clean their Krumpers Climate Control Solar Blinds™, they

can be cleaned. Krumpers Climate Control Solar Blinds™ are tough, durable and sun rot resistant. Besides their shading effect, the blinds will reduce a household's energy loss which in turn contributes to a savings on home energy bills. Diana Livshits of Krumpers Ottawa says that their goal is to provide a first rate product that provides homeowners with both energy and financial savings. Always looking out for additional ways to help her customers by keeping apprised of the latest energy trends, Livshits recently attend a Green Conference featuring former U.S. President Bill Clinton and former New Brunswick Premier Frank McKenna. "It was really interesting said Livshits, "they have their eye in the big energy picture and its businesses like Krumpers who are delivering that message through our product offerings with consumers." ■
