Krumpers
Solar Blinds

K Krumpers Solar Solutions has enjoyed unparalleled growth and customer satisfaction in just four years. You can clearly see why. It's the Ottawa-based company behind Krumpers Solar Blinds, innovative window coverings that cut heating and cooling costs while allowing you to enjoy an unobstructed view. Elegance, comfort and energy savings can be achieved while maintaining not only the view but the architectural interest of the home. As countless purchasers know, Krumpers stands for a product that has not only withstood the test of time but the test of long-term customer satisfaction.

These solar blinds have existed for over 27 years, and they're still in use at numerous homes and high-profile buildings, still performing, saving energy and providing a clear view. Since taking over the product, Krumpers' dynamic team has been able to not only outfit more than 1500 homes in the Ottawa area, but numerous facilities as well. "We have hundreds of repeat customers," says owner Diana Livshits, "whether it's because they move into new homes or they're making the rest of their existing homes more comfortable."

Thanks to its in-house engineering capabilities, Krumpers is able to provide highly customized solutions, including solar blinds for Viceroy Homes, trapezoid windows and skylights.

Winner of Homestars' Best Blinds of 2010 honours, Krumpers has been recognized for outstanding quality and service both by the industry and countless customers. Diana Livshits and her staff members are dedicated to preserving that standard of excellence in every single installation. "This is clearly evident in our upfront pricing policy, punctuality and honesty about the benefits and drawbacks of this outstanding product."
